

Falcon Waterless Urinal – Cleaning Instructions

envirocare
systems
clean + green at heart

Daily

Remove any foreign objects and debris from the base of the urinal.

Spray the urinal with pre-diluted Greenheart Washroom Wizard.

Wipe clean with a damp cloth, sponge or paper towel.

If odours are present, *gently* pour approximately 25ml of Greenheart OilSeal directly into the base of the urinal.

Weekly

Remove the plastic deflector disk from the urinal, spray the bottom of the disk with Greenheart Washroom Wizard and agitate with a nylon brush. Allow to stand while continuing with the urinal.

Pour approximately 2 litres of warm or cold tap water quickly into the urinal to clear and flush the cartridge. This will dislodge and rinse sediment from the waste pipe. This minimizes the formation of uric scale (Struvite) build-up that occurs downstream of waterless urinals and leads to damaged plumbing.

Spray the urinal with pre-diluted Greenheart Washroom Wizard.

Starting at the top and working down, clean the urinal by agitating the solution using a hand held nylon brush. Pay particular attention to the drain area and the outside bottom of the urinal.

Remove the cleaning residue with a damp cloth, sponge or paper towel.

Gently pour 25ml of Greenheart OilSeal directly into the cartridge.

Rinse the plastic deflector disk and place back into the urinal

Special Notes:

Do not use abrasive cleaners, metal brushes or instruments to clean the urinal as they will damage the finish

Do not remove the Eco-Trap cartridge as part of the cleaning process

Do not pour mop buckets or other volumes of liquid into the drain. It will compromise the oil sealant and disrupt the maintenance process.

Do not use bleach, acids or other cleaning chemicals to clean the urinal. They will cause irreparable damage to the urinal by breaking down the internal seals. Damaged seals allow raw urine to seep out of the bottom of the urinal and permits sewer gases to escape into the room. The only solution to damaged seals is full urinal replacement.

Consumables

Greenheart OilSeal is a natural, non-hazardous, biodegradable vegetable oil based additive for waterless urinals. It has specific gravity that is lighter than water and urine, enabling it to float above the contents inside a waterless urinal cartridge. This float acts as a liquid barrier sealant, effectively allowing urine to pass through and then trapping it and the odours on the other side. It has the added advantage of containing beneficial microbes. The microbes prolong the life of the cartridges and assists in maintaining free flowing trouble-free drains.

Greenheart Washroom Wizard is a natural, non-hazardous, biodegradable cleaner especially formulated to clean and deodorise washrooms and waste drains. It contains beneficial enzymes that target and degrade a wide range of proteins, oils, scale and organic matter that accumulate within the washroom environment, and beyond. It's very effective at eliminating odours, and safe for sewer, septic, composting toilets and all waterless urinals. Best of all, it's safe for people, plants, animals, marine life and all surface types.

Reorder Codes

Item Name	Item Code
Greenheart OilSeal, 2 litre	3020-RSC06
Greenheart Washroom Wizard, 2 litre	3118-R22
Greenheart Washroom Wizard, 5 litre	3118-R27
Atomising Spray Bottle for use with Greenheart Washroom Wizard, 750ml comes with usage and dilution instructions	3118-R40
