

Urimat Waterless Urinal - Cleaning Instructions

Daily

Remove any foreign objects and debris from the base of the urinal.

Spray the urinal with pre-diluted Greenheart Washroom Wizard.

Wipe clean with a damp cloth, sponge or paper towel.

Weekly

Pour approximately 2 litres of warm or cold tap water quickly into the urinal to clear and flush the siphon. This will dislodge and rinse sediment from the waste pipe. This minimizes the formation of uric scale (Struvite) build-up that occurs downstream of waterless urinals and leads to damaged plumbing.

Remove stainless steel filter from the urinal, spray with Greenheart Washroom Wizard and agitate with a nylon brush. Allow to stand while continuing with the urinal.

Spray the urinal with pre-diluted Greenheart Washroom Wizard.

Starting at the top and working down, agitate the solution using a hand held nylon brush. Pay particular attention to the black seal surrounding the waste outlet and the outside bottom of the urinal.

Remove cleaning residue by rinsing with fresh water and wiping with a damp cloth or paper towel.

Rinse the stainless steel filter and place back into the urinal.

Special Notes:

Do not use abrasive cleaners, metal brushes or instruments to clean the urinal as they will damage the finish

Do not remove the Eco-Trap cartridge as part of the cleaning process

Do not pour mop buckets or other volumes of liquid into the drain. It will compromise the maintenance process.

Do not use bleach, acids or other cleaning chemicals to clean the urinal. They will cause irreparable damage to the urinal by breaking down the internal seals. Damaged seals allow raw urine to seep out of the bottom of the urinal and permits sewer gases to escape into the room. The only solution to damaged seals is full urinal replacement.

Consumables

Greenheart Washroom Wizard is a natural, non-hazardous, biodegradable cleaner especially formulated to clean and deodorise washrooms and waste drains. It contains beneficial enzymes that target and degrade a wide range of proteins, oils, scale and organic matter that accumulate within the washroom environment, and beyond. Effective at eliminating odours, and safe for sewer, septic, composting toilets and all waterless urinals. Best of all, it's safe for people, plants, animals, marine life and all surface types.

Reorder Codes

Item Name	Item Code
